Model Aircraft Flying

1. This AIC details information and procedures for pilots with regard to Model Aircraft operating close to the boundary of FYWE and FYWH CTR, as published in the AIP ENR 5.5.
2. Recent incidents related to lower flying aircraft conflicting with Model Aircraft operating at Heja Lodge were brought to NCAA's attention. The FYWE VFR Route Charts were reviewed and it was established that the Visual Approach Chart published in the AIP under FYWE AD 2-20 with regard to VFR point HEJAL, the Exit altitude was incorrectly published in such that, it allows aircraft to fly overhead HEJAL at or below 7000FT. This was corrected by hand amendment of the AIP with NOTAM A0013/19.
3. Pilots are advised to cross overhead HEJAL at 7000FT or higher and look out for the Model Aircraft.
4. This AIC will be reviewed annually to ensure that the content fit its purpose.
